

MINISEL BALEINE

Minisel La Baleine is a blend of mineral salts with salting properties. It is composed of 66% potassium chloride (KCl) and 33% sea salt obtained from our site at Aigues Mortes.

PHYSICAL AND CHEMICAL CHARACTERISTICS

		Unit	Values
Typical values	Granularity		Crystals between 160 and 600 μm
	Loss of mass (at 110° C)	%	< 0.1
	Potassium	%	35
	Sodium	%	13
	Calcium	ppm	100
	Sulphate	ppm	250
	Insolubles	%	1
	Visible density (non compressed salt)		1.1

TREATMENT

- Magnesium carbonate (E504ii) : 1 %
- Yellow prussiate of soda (anticaking agent E535) : 20 mg/kg maximum expressed as $\text{K}_4\text{Fe}(\text{CN})_6$.

USE-BY DATE

To be consumed : date of manufacture + 3 years.

STORAGE CONDITIONS

In a clean, dry and cool place.

USAGE

As for table salt.

In constant pursuit of customer satisfaction and quality improvement, this product is manufactured under quality assurance scheme ISO 9001 version 2008 and with respect to fabrication practices based on the HACCP (Hazard Analysis Critical Control Point).
