

## RESIMAX PEBBLES/TABLETS

(in conformity with EN 973 type A)

*Evaporated salt is produced through solution mining and mechanical evaporation process. Modern production processes of vacuum salt from SALINS DU MIDI ET DES SALINES DE L'EST enable to get a salt with high chemical purity, without element harmful or encrusting for the resins.*

*RESIMAX pebbles/tablets are obtained by compression of this fine salt of very high purity. The shape of these pebbles guarantees a good dissolution and avoid the sedimentation and caking in the storage tank of the water softener.*
