

AQUASWIM[®] TABLETS

SALINS company processes vacuum salt to get a salt of very high chemical purity (NaCl content higher than 99,9 %) without any harmful element to swimming pools surfaces. AQUASWIM[®] tablets are obtained by compression of this salt added to a stabilizer of chlorine, the quantity of which has already been measured (patent nr 9015499).

AQUASWIM[®] is a special salt for swimming pools. In a tablet, it allies the salt necessary to the electrochlorination and the stabilizer essential to extend the life of chlorine.

CHEMICAL AND PHYSICAL CHARACTERISTICS - TYPICAL VALUES

Chemical

Loss of mass at 110°C (water content) 0.08 %

ON DRY BASIS :

NaCl 99.3 %

Isocyanuric acid (stabilizer) 0.7 %

Magnesium ≤ 5 mg/kg

Iron ≤ 2 mg/kg

Manganese ≤ 2 mg/kg

Physical

Shape cylinder

Density about 2.1

Solubility at 20°C . . . 358 g/kg of water

TREATMENT

None

PACKAGING

Heat sealed polyethylene bags : 25 kg on 800 x 1200 mm wrapped pallets of 1000 kg net weight.

Store in a dry and cool place away from the sun.

USE

Disinfection of swimming pools' water for the electrochlorination (domestic use).

DIRECTIONS FOR USE

- Wait at least 6 hours for AQUASWIM[®] to be fully dissolved before switching the electrochlorinator on.
- Do not pour AQUASWIM[®] neither in the areas of the pool where there is almost no water circulation nor in the surface skimmers.

PRODUCTION PLANT

Saline of Dax (40) - France

Cie des Salins du Midi et des Salines de l'Est

Limited Company with capital value of 113 400 000 Euro - 412.431.744 R.C.S. NANTERRE
137 rue Victor Hugo - 92532 LEVALLOIS PERRET CEDEX - France
